Career Objective

B.Tech student specializing in AI & ML with hands-on experience in Machine Learning, Computer Vision, and Full Stack Development. Seeking internship opportunities to apply technical and problem-solving skills.

Education

B.Tech, CSE (AI & ML)	2025–2028
Institute of Aeronautical Engineering	CGPA: 8.75/10
Diploma, Computer Science & Engineering	2022–2025
SVS Group of Institutions	CGPA: 9.61/10
Secondary (SSC)	2022
T.S. Model School	CGPA: 9.50/10

Work Experience

Machine Learning Intern Feb 2026

Future Interns

- Completed a 1-month internship focused on machine learning model development.
- Applied Python-based machine learning techniques for data preprocessing and predictive analysis.

Full Stack Developer Intern (MERN Stack) Oct 2025–Nov 2025

Novitech R&D Pvt. Ltd

- Developed responsive web applications using MongoDB, Express.js, React, and Node.js.
- Built backend APIs and managed database operations.

Python Intern May 2024–Nov 2024

Ira Om Technologies Pvt. Ltd, Warangal

- Developed Python-based mini projects under industry mentorship.
- Strengthened debugging and analytical problem-solving skills.

Projects

Forecast Pro – Machine Learning Forecasting System

- Developed a machine learning forecasting system to analyze historical datasets and predict future trends.
- Implemented data preprocessing, feature engineering, and model training using Python ML libraries.
- Built visualization outputs to interpret predictive analytics and support decision making.

Instance Segmentation using Mask R-CNN

- Implemented pixel-level object detection and instance segmentation using Mask R-CNN with OpenCV's DNN module.
- Utilized a COCO-pretrained model to detect multiple objects simultaneously in images.
- Optimized preprocessing and inference pipeline for accurate mask overlay visualization.

TriageFLOW – Smart Emergency Triage System

- Developed a web-based hospital coordination platform for dynamic patient prioritization.
- Implemented rule-based severity scoring to classify emergency cases efficiently.
- Designed dashboard interfaces to support faster decision making in emergency response scenarios.

Technical Skills

Programming Languages: Python, Java, C++

Web Technologies: HTML, CSS, MERN Stack (MongoDB, Express.js, React, Node.js)

Tools: Git, GitHub, Streamlit, Netlify, Vercel

Cloud: AWS

Certifications

- AWS Cloud Practitioner Essentials
- Machine Learning with Python (IBM)
- Full Stack Development (MERN Stack)
